

# SYNITRO-23

SYNITRO-23 is a proprietary formulation of nitrogen fortified with proprietary carbon synergists, organic acids, amino polycarboic saccharides, and natural plant fermentation extracts. SYNITRO-23 could be used early after dormancy break, and just prior to dormancy on warm season types to induce root and rhizome development.

## CONTAINS 4 TYPES OF NITROGEN:

- Ammoniacal Nitrogen
- Nitrate Nitrogen
- Urea Nitrogen
- Amino Acid Nitrogen From Ammonium lactate

## GUARANTEED ANALYSIS

Total Nitrogen	23.0%
Ammoniacal Nitrogen	7.66%
Nitrate Nitrogen	7.66%
Urea Nitrogen	7.68%

Derive from: Ammonium Nitrate and Urea

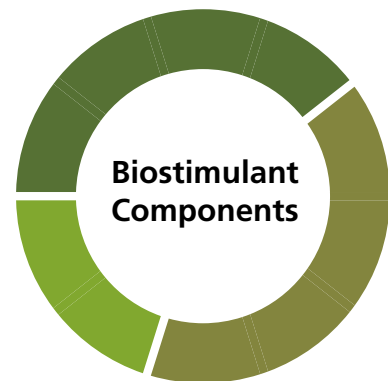

For all turf types

Suited for cool season turf types

Tank mix friendly

- GIBBERELLINS
- AUXIUS
- CYTOKINES

## COMPATIBILITY

SYNITRO-23 is tank mix compatible with most other nutrient combinations and pesticides. Where compatibility is not known always check with a standard quart jar method prior to tank mixing.

## APPLICATION

Apply with any equipment that delivers a fine foliar mist to the turf.

## RATES AND DIRECTIONS

Generally apply 5-6 fl. oz. per 1,000f<sup>2</sup> (150-180 milliliters per 100 m<sup>2</sup>). Begin application in spring and apply every 3-4 weeks throughout growing season.
