

TRUPRO

TRU-PRO is an Amino Acid Nitrogen fortified with balanced natural biostimulant. Its purpose is for a foliar supplement to intensively managed turf grasses. It is used on all fine turfgrasses to produce a long chain amino acid protein in the turf to make it hardy, durable, and aesthetically pleasing. It is also a desirable spray component under environmental conditions that favors plant disease development and even after the onset of disease.

CONTAINS:

- Long chain amino acids
- Energy producing pyro-potassium phosphates
- Naturally occurring biostimulants
- Enzymes
- Fermentation extracts
- Carbon synergists

GUARANTEED ANALYSIS

Total Nitrogen	6.0%
6.0% Amino Acid Nitrogen	
Ammoniacal Nitrogen	2.0%
Nitrate Nitrogen	3.0%

Derive from: Leather hydrolysate Ammonia lactate, and Potassium Pyro Phosphates

COMPATIBILITY

TRU-PRO is tank mix compatible with a wide range of nutrients and most pesticides. Where compatibility is unknown a standard quart jar test should be done prior to tank mixing.

APPLICATION

Apply with any equipment that delivers a fine foliar mist to turf.

RATES AND DIRECTIONS

Apply at the following rates on all turf types.

GENERAL TURF MAINTENANCE: Apply 5-6 fluid ounces per 1,000 f^2 every 12-15 days throughout growth periods.

SHADE AREAS: Apply 7.5-9.0 fl. oz. per 1,000 f^2 and repeat as necessary.

TURF RECOVERY: Apply 6 fl. oz. per 1,000 f^2 every 10-14 days.

For all turf types

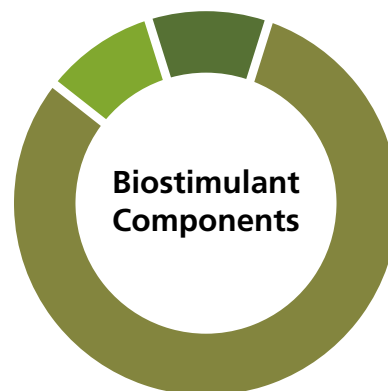

Produces durability

Suited for all seasons

Tank mix friendly

- GIBBERELLINS
- AUXIUS
- CYTOKINES
